
Summary

Highly analytical B.Tech Computer Science student specializing in AI/ML (8.91 CGPA) with a focus on Retrieval-Augmented Generation (RAG) and NLP. Proven ability through internship experience and a published paper (ResumeBERT-HIRENET) to build end-to-end AI solutions. Passionate about solving complex, real-world problems through machine learning.

Education

- B.Tech, VIT BHOPAL UNIVERSITY (8.91 CGPA) Sep 2024 - Aug 2028
Computer Science Engineering with Specialization in Artificial Intelligence and Machine Learning
- Higher Secondary (Class XII), CBSE, Raman Munjal Vidya Mandir (92%) Apr 2022 - Mar 2023
Science (PCM)
- Secondary (Class X), CBSE, Raman Munjal Vidya Mandir (94%) Apr 2020 - Mar 2021

Work Experience

1. Virtual Intern, 1M1B in collaboration with IBM Skillsbuild Dec 2025 - Jan 2026
 - Developed AI system for waste classification (Organic, Recyclable, Hazardous, Landfill)
 - Used RAG for context-aware, localized waste management guidance
 - Promoted circular economy and applied Responsible AI principles
2. Virtual Intern, Shell India Markets Private Limited Jun 2025 - Jul 2025
 - Implemented advanced transfer learning with the MobileNetV2 model to create a waste classifier that identifies six classes of waste from image inputs.

Organizational Experience

1. Treasurer, Entrepreneurship-Cell VIT-Bhopal Aug 2025 - Present
 - Directly managed and tracked comprehensive budgets for large-scale campus events, ensuring fiscal accountability.
 - Coordinated with the student leadership team to allocate resources efficiently for entrepreneurship-focused initiatives.
2. Core Member, Finance and Sponsorship Team, Entrepreneurship-Cell VIT-Bhopal Nov 2024 - Aug 2025
 - Identified and secured corporate sponsors for flagship events through professional outreach and negotiation.
 - Established and nurtured long-term relationships with industry partners to build a sustainable sponsorship pipeline.

Projects

1. AutoEmail-RAG : <https://email-rag-gilt.vercel.app/>
Built an AI-powered web app that generates email replies by analyzing previous responses and company policy documents using Retrieval-Augmented Generation (RAG). Users can connect their Gmail account, upload policies, and the system retrieves relevant context to draft accurate replies to new emails. Generated responses are automatically saved in the Gmail Drafts folder for quick review and sending.
Completely risk-free as no user data is being stored in databases.
2. Aarogya Sarthi : <https://aarogya-sarthi.vercel.app/>
Aarogya Saathi is a mobile-first platform designed for low-literacy and multilingual rural communities. Built solution around three pillars: interactive emergency simulations (e.g., snakebite first aid), a multilingual voice-first RAG-powered health assistant with verified medical guidance, and a scheme eligibility checker linking families to programs like Ayushman Bharat to reduce medical financial risk
3. Certiflex : <https://thecertiflex.vercel.app/>
Built a web extension to validate your learnings on youtube with a dual layer proof of engagment (Active timestamp verification and attention checks) so the learner cannot skip the course to get a certificate.
QR Code verification for certificates

Skills

1. AI & Machine Learning

Core Frameworks: PyTorch, Scikit-learn

Data Manipulation: NumPy, Pandas.

Computer Vision: OpenCV, MobileNetV2 (Transfer Learning).

NLP & Generative AI: Natural Language Processing (NLP), Retrieval-Augmented Generation (RAG), BERT, Named Entity Recognition (NER), Sentiment Analysis.

2. Programming & Backend

Languages: Python, Java, SQL

Web Frameworks: FastAPI

Databases: MongoDB, MySQL

3. Tools & Developer Workflow

Version Control: Git

Deployment: Vercel (implied by project links)

Integrated Systems: Agentic Frameworks (ResumeBERT), API Integration (Gmail API)

Certifications

1. Programming with generative AI, NPTEL

Aug 2025 - Oct 2025

2. Python for data science, AI and development, COURSERA

Sep 2024 - Oct 2024

3. Applied Machine Learning in Python, University of Michigan , Coursera

Nov 2025 - Dec 2025

Publications

1. ResumeBERT-HIRENET : An Intelligent Agentic Framework for autonomous recruitment optimization

Aug 2025 - Oct 2025

- ResumeBERT bridges the gap between qualified candidates and overwhelmed recruiters through intelligent automation. This full-stack platform leverages cutting-edge NLP (BERT, NER) to transform unstructured resumes into structured data, while our fairness-aware scoring algorithm eliminates demographic biases prevalent in traditional hiring systems.
- Check out the paper : https://ijirt.org/publishedpaper/IJIRT185215_PAPER.pdf

2. RailVLM: An Integrated YOLOv8 and Vision Language Model Framework for Explainable Real-Time Railway Track

Fault Detection and Maintenance Decision Support

- RailVLM is an intelligent real-time railway inspection system designed to detect faults in railway tracks using advanced Artificial Intelligence techniques. The system combines high-speed object detection using YOLOv8 with Vision Language Models (VLMs) such as Moondream2 or API-based models like Gemini to provide explainable and human-readable diagnostics.
- Check out the paper : https://ijirt.org/publishedpaper/IJIRT197650_PAPER.pdf

Achievements

- Ranked 30 out of 4000 colleges in National Entrepreneurship Challenge hosted by IIT-Bombay
- TCS CodeVita AIR 5774 (Global Rank)
